

Leostream Quick Start

Quick Start

Leostream offers 'Quick Start' services to assist customers with implementing and integrating the Leostream solution in their environment.

Services

The following services are offered in the Leostream Quick Start.

- Architecture Overview
- Integration with Active Directory, LDAP for authentication
- Import desktops from one environment, such as AWS, Azure or VMware
- Integration with the Leostream Gateway
- Overview of Connection Broker policies for desktop offers
- Overview of user assignments and desktop offers
- Instruction on installation and configuration of the Leostream Agent
- Overview of System logs and maintenance

Estimate

Leostream estimates a maximum of 4 professional services hours are needed to complete the services above. Estimates are based on time and materials.

Disclaimer

Leostream assumes access to the required resources and a network configuration that supports the environment. It is not responsible for configuration of the Linux servers where the Leostream environment is installed.
